

◆ PROTECTION TREATMENT

ANTI-SCUFF FILM

An efficient solution to prevent intentional or unintentional damage on surfaces in urban areas.

PROPERTIES

- Protects against all kinds of scuff.
- Prevents graffiti.
- Resistant to acid graffiti.
- Transparent, no optical illusion.

STRONG POINTS

- Cost-effective compared to the replacing of the substrate.
- Low maintenance.
- No interruption of onsite activities during the intervention.
- Cost-effective and environmentally-friendly.
- Does not damage the original state of the substrate when removing the film.

APPLICABLE SUBSTRATES

The film can be applied on all smooth glass or metal surfaces even painted: car body, metal cladding, window displays, glazed façade, stainless steel, etc.

APPLICATION PROCESS

The anti-scuff film can be applied outdoors or indoors. For complete protection, the film can be applied on both sides. The surface must be perfectly clean. If the surface is damaged, it has to be repaired beforehand. The application must be done by professionals. Our teams are certified by the biggest film suppliers and manufacturers. Our teams are well-equipped. For outside high-rise work, they will use aerial lifts, scaffolding or rope and wear safety harnesses. The intervention area will be marked out. Interventions are possible 24/7.

APPLICATION FIELDS

- STREET FURNITURE.
- PUBLIC TRANSPORT (VEHICLES AND SPACES).
- ESTATE.
- SHOPS AND RETAILS.
- ...

◆ CARACTÉRISTIQUES

- Printable transparent film.
- 100 microns thick.
- Easy care (resistant, no need for special clean).
- Possible combination with other features: solar, anti-intrusion, tinted, publicity, etc.
- All film ranges are SBI-tested (limited fire and smoke propagation) and can be used in all public facilities.
- Up to 10 years warranty for inside use and to 5 years for outside use depending on the inclination of the substrate.
